Town of Eagle Planning Department

200 Broadway

Eagle, CO 81631

RE: Proposed AT&T Antenna Installation (WCF). Subdivision: Eagle, Block: 23, Lots: 1-24. 500 Broadway Street, Eagle CO 81631.

Project Narrative:

AT&T has been appraised of the poor cell coverage within this area of the Town of Eagle. To help enhance the coverage, AT&T is proposing to install (1) 2" tall x 14.5" wide omni antenna onto the Eagle County Government building located at 500 Broadway Street. The omni antenna is proposed to be installed on the top of the existing stairwell tower, specifically the flat portion of the top, centered and painted to match the black roofing material. This proposed installation's intent is to minimize the visual impact on the public as much as possible without the addition of larger footprint concealment or screening. The painting of said omni antenna will properly blend and or camouflage with the existing structure to keep the visual impact minimal. The installation of the omni antenna will provide cellular coverage to the surrounding area of the Eagle County Government building, enhancing experience and overall performance for AT&T subscribers.
